REASON FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The present invention is directed to an apparatus for recording and reproducing MPEG streams of different chroma formats without need to recognize their formats.

Each independent claim identifies the uniquely distinct features "stopping a process for the input digital video signal in a period corresponding to the difference between a predetermined information amount represented by a second chroma format and the information amount represented by the first chroma format when the information amount represented by the first chroma format is smaller than the information amount of the second chroma format corresponding to the first chroma format detected by said detecting means".

Lim, US 6,333,952 discloses a decoder for a digital TV receiver which improves the picture quality of a video signal by converting a format of the data into a format for display in down sampling.

Park, US 6,577,352 discloses an image chrominance signal filtering method and apparatus in which object chrominance information and background chrominance information are extracted in an image format conversion process based on shape information of luminance signals.

Jiang, US 6,297,801 discloses an apparatus and method for scaling up a set of video data uses variations in the black and white components of a graphic image to better generate missing color components in an image.

None of the prior art, either singularly or in combination, fails to anticipate or render the above underlined limitations obvious.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nigar Chowdhury whose telephone number is 571-272-8890. The examiner can normally be reached on 9 AM - 5 PM.
